

CONDOR COUNTRY
CONSULTING, INC.

Client: State Route 4 Bypass Authority
Services: Biological Services for State Route 4, Segment 3
Year: 2006-2008
Value: \$206,000

Description of services rendered: Condor Country reviewed all environmental documentation for this project and prepared a monitoring program for the remaining two years of the project. Species at issue included California red-legged frog, San Joaquin kit fox, Swainson's hawk, burrowing owl, and nesting birds. Condor Country coordinated with wildlife agencies, Bypass representatives, species experts, engineers, and contractors to ensure that wildlife were protected during the construction of the new road. Condor Country Consulting performed all pre-construction surveys and monitoring for this project. Exclusion of hundreds of burrowing owls dens and daily monitoring of two Swainson's hawk nesting pairs were the largest project issues.
